

Illustrated Quick Guide

Fill the watertank.
Check out more info on User Manual.

7 Removing the tree

How to place the tree:

1. Cut the trunk crosswise, if not delivered with a clean cut. Remove the bottom bark from the trunk, up to 8 - 10 inches.
2. On the Super Grip, turn the ring clockwise until it stops. Now the Super Grip is in start position.
3. Place the trunk on the edge of the springs, then position the tree vertically.
4. Push the tree half way down. You can still adjust the tree in this stadium. When satisfied, push the tree to the bottom of the Super Grip.
5. Then, lift the tree (the Super Grip is now connected to the tree trunk) and give it a **gentle** push against the floor, to be sure the spike goes into the trunk.
6. Your tree is now in place, fill the watertank and you are ready to decorate your tree.

How to take the tree out:

7. Turn the tree counterclockwise. The springs release the tree from the Super Grip, and you can lift the tree out.

Welcome

Congratulation with your new Super Grip Christmas tree stand.

This folder contains a Quick Guide for easily setting up your Christmas tree. The following CD contains a movie showing the setup. For Christmas tree set up on a hospital, kindergarten etc., we advise to check out external material on CD.

SuperGrip Christmas stand is just as easy as it is genius. Finally a Christmas stand with no screws.

With SuperGrip you simply place the tree right down into the stand . Powerfull steelgrips and a spike in the bottom holds the tree firmly in place. Water container is integrated. The patent applied lock mechanism holds the tree and makes it amazing easy to take the tree out when Christmas is over.
